for travel scholarship

### Learn about:

- Preserving traditional crops by growing seeds: hand-pollination, isolation distances, seed cleaning equipment, variety improvement, and preservation through selection.
- Cooperative models for producing seeds, selling seeds and sharing equipment. Does collaborating to grow, clean or sell seeds make sense for you?

This workshop is for growers who have some experience with basic seed production and would like to deepen their knowledge.

To register online visit: <http://www.cccd.coop/events/seedworkshop>

*Hosted by the California Center for Cooperative Development in collaboration with Traditional Native American Farmers Association, Native Seeds Search, and San Xavier Cooperative Farm Funding provided through USDA Rural Development grant*
